(7) Set up the client host machine (设置客户机主机)

After the client computer is turned on, it can automatically scan to the boot client here, and you can manually input the client information here, and it will be displayed in the server client list after adding.

Select multiple clients on the left or press Ctrl, which can be deleted by clicking to delete, which is no longer displayed in the server client list.

Client installation upgrade is to install client parts and update the client version via the server

View the client hardware information is to view the client motherboard, graphics card, mouse, keyboard and other hardware devices.(In the server system setting- -set parameters--client setting, cancel the client hardware information alarm limit)(客户机电脑开机后,可以在这里自动扫描到开机的客户机,可以在这里手动输入客户机的信息,添加后会在服务端客户机列表中显示出来。

在左侧单选或按 Ctrl 多选客户机,可以通过点击删除删掉,删除后在服务端客户机列表 里也不再显示了。

客户端安装升级是通过服务端安装客户端件和更新客户机版本

查看客户机硬件信息是查看客户机主板、显卡、鼠标、键盘等硬件设备。(在服务端系统设置--设置参数--客户端设置里,取消客户机硬件信息报警限制))

(2) Restore data (恢复数据)

Database backup is divided into "instant backup database" and "regular backup database".

Restore backup account information: refers to the account information in the software before recovery, without the parameters related to setting.

Restoring the entire database: refers to the recovery of all information in the previous software, including the member account, parameter setting and other information.

Recovery operation steps: database management- -1 restore data- -2 restore backup account information (restore the whole database, restore cancellation account) - -3 select file- -4 select data source- -5 open- -6 start recovery- -7 recover successfully.

(数据库备份分为"即时备份数据库"和"定时备份数据库"。

恢复备份账号信息:是指恢复之前软件中的所以账号信息,不包含设置相关的参数。

恢复整个数据库:是指恢复之前软件中的所有信息,包含会员账号,参数设置等所有信息。

恢复操作步骤:数据库管理--1恢复数据--2恢复备份账号信息(恢复整个数据库、恢复注销账号)--3选择文件--4选择数据源--5打开--6始恢复--7恢复成功。)

elect recovery	• Restore backup account information
<i>ypu</i> .	Resume cancellation account
	Restore the entire database
ote: Before 2015, nformation can b	, the database can not be recovered completely, only account e restored.!
elect the file n	ame to restore database: Select file

(8) Client overtube login(客户端超管登录)

Some user overpass password is forgotten, it is not easy to test, you can directly through the right button operation, if you right button does not have this choice, you can see whether there is permission, or the old version needs to be upgraded.

三、Cash cow Internet cafe management software client main interface(摇钱树网吧管理软件 客户端)

In the client using supertube login, the software will automatically pop up advanced Settings, if there is no pop-up, you can choose in the lower right corner of the desktop client software icon right click, click "Advanced Settings" to manually open the operation. (在客户端使用超管登录, 软件会自动弹出高级设置, 如果没有弹出, 可以在桌面右下角选择摇钱树客户端软件图标点 右键, 点击"高级设置"手动打开进行操作。)
